

**REMARKS**

Claim 5 is pending in the present application as amended. Applicant has added claim 4, while canceling claims 1-4. No inference as to the potentiality of the cancelled claims should be made other than it was more cost effective to cancel the objected claims rather than amend them to conform to the style required by the Patent and Trademark Office. Consequently, Applicant respectfully submits that claim 4 is now in a condition for allowance.

**Response to Claim Objections**

The Examiner objected to claims 1-4 is now moot. Applicant has cancelled claims 1-4.

**Response to 35 U.S.C. §112 Rejections****Specification:**

The Examiner objects to the specification under 35 U.S.C. §112. Specifically, the Examiner does not understand the term “bubbled one-piece intensified soundproof layer”. Bubbled one-piece intensified soundproof layer is a layer of soundproofing that adds to the strength of the box as disclosed by the Applicant.

**Claims:**

The Examiner rejected claims 1-4 under 35 U.S.C. §112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The rejection is moot because the Applicant canceled claims 1-3.

**Response to 35 U.S.C. §102 Rejections**

The Examiner rejected claims 1 and 2 under 35 U.S.C. §102(b) as being anticipated by Perrigo patent (U.S. 4,592,444, hereafter the '444 patent). The '444 patent fails to describe or teach all of the claim limitations as claimed by Applicant. In claim 5, Applicant claims; "a soundproof layer installed inside the box that structurally increase the strength of the box." The '444 patent does not describe or teach soundproofing increasing the strength of the box.

Therefore, the elements of claim 5 are not taught or described by the '444 patent and claim 4 is in condition for allowance.

**Conclusion**

In view of the foregoing discussion and analysis, Applicant respectfully submits that claim 5 is in a condition for allowance, which such action is earnestly solicited.

Respectfully submitted,  
Chen-Hui Huang
